

Menna Aliwa

AI-Powered Frontend Developer & IT Student

El Sharqia, Egypt | mna80455@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Information Technology student specializing in AI-powered web development. Proficient in using AI tools (Antigravity AI) to design, build, and deploy production-ready applications. Strong foundation in HTML, CSS, JavaScript, and modern web architecture. Skilled in translating ideas into functional products rapidly using AI-assisted workflows. Built and launched 8+ production-ready projects ranging from SaaS platforms and AI-powered tools to mobile-first applications. Experienced in leading academic development teams, system analysis, database design, and API integrations. Seeking a Frontend or Full-Stack Internship where I can contribute technical skills while gaining industry experience.

EDUCATION

Faculty of Technology and Industry, Delta Technological University

Expected Graduation: 2027

TECHNICAL SKILLS

AI Development	Antigravity AI, AI-Powered Coding Workflows
Frontend Fundamentals	HTML5, CSS3, JavaScript (ES6+)
AI-Generated Frameworks	React, Next.js (via AI tools)
Backend & Databases	Firebase, Supabase, Oracle SQL
Design	Stitch AI (Google), UI/UX Design
Tools & Platforms	Git, GitHub, Vercel, VS Code
Concepts	Data Structures & Algorithms, OOP, System Analysis, REST APIs, Responsive Design

PROJECTS

QR for You — Advanced QR Code Generator

qr-for-you.vercel.app

- Designed and deployed a full-featured QR code generator using Antigravity AI, implementing custom dot styles, color gradients, branded logo embedding, and frame design.
- Built frontend architecture with AI-generated React components, optimized for performance and user experience.
- Implemented scan viability testing to ensure every generated QR code is functional before export.
- Added high-resolution and vector export support for professional and print use.

Tech: Antigravity AI, React, JavaScript, Canvas API, Vercel

أيام (Days) — Arabic Daily Mindfulness App

days-app-ar.vercel.app

- Developed a PWA Arabic-language mindfulness companion using Antigravity AI, with morning and evening reflection modes.
- Designed UI/UX with Stitch AI (Google) for intuitive user experience and dynamic color themes.
- Integrated a "Life in Weeks" visualization grid, push notifications, and offline support.
- Used Firebase as the backend for real-time data persistence.

Tech: Antigravity AI, Stitch AI, React, Vite, Firebase, PWA

Wasl (وصل) — University Employment Platform

wasl-platform-nu.vercel.app

- Designed and built an Arabic-language internship and employment platform for Egyptian universities using Antigravity AI, inspired by Handshake.
- Created UI/UX prototypes and final designs with Stitch AI (Google) for student profiles and company dashboards.
- Implemented a job aggregator pulling listings from Indeed, Wuzzuf, and LinkedIn.
- Added PWA support to ensure full mobile accessibility.

Tech: *Antigravity AI, Stitch AI, Next.js 14, Supabase, PWA, Vercel*

UniRoute — University Transport System

uni-route.vercel.app

- Built a mobile-first transport management system with Antigravity AI, featuring a 3-app architecture for students, drivers, and parents.
- Designed system interface and user flows using Stitch AI (Google).
- Delivered full system documentation: ERD, DFDs (Context–Level 2), Oracle SQL schema with 3NF normalization, and a feasibility study.
- Implemented core data structures in C++: Queue, Stack, Linked List, and Dijkstra's algorithm for route optimization.

Tech: *Antigravity AI, Stitch AI, React, C++, Oracle SQL*

Portfolio Generator — AI-Powered Developer Tool

portfolio-generator-tau.vercel.app

- Built a tool using Antigravity AI that generates professional developer portfolios through Claude API with multiple customizable templates.
- Designed user interface and experience with Stitch AI (Google) for seamless template selection and customization.
- Designed a built-in ATS scoring system to help developers evaluate and improve their CV content.

Tech: *Antigravity AI, Stitch AI, Claude API, JavaScript, Vercel*

Invoice Generator — Business Productivity App

invoice-generator-azure-nine.vercel.app

- Built a full invoice management app using Antigravity AI with PDF export, multi-currency support, and WhatsApp and email sharing.
- Designed clean and professional UI with Stitch AI (Google) for business users.

Tech: *Antigravity AI, Stitch AI, React, Firebase, JavaScript*

LEADERSHIP & TEAM EXPERIENCE

Team Lead — UniRoute Academic Project

- Led a student development team in designing and building a university transportation management system.
- Coordinated project planning, task distribution, documentation, and technical implementation.
- Presented project deliverables including system analysis, database design, and software architecture.
- Achieved strong academic evaluation with project grades in the A/B+ range.

ACADEMIC TEAM PROJECTS

- Participated in collaborative projects in Database Systems, Data Structures, Java Programming, and Software Analysis & Design.
- Worked within development teams using planning, documentation, presentation, and implementation practices.
